Portfolio

Profile

Software engineer and self appointed “maker” with more than 8 years of experience. I like creating things from the ground up and finding solutions to everyday problems using technology in all of its forms.

Experience

Tumble - Senior Backend Developer – 2022 – 2022

Worked in developing software for physical hardware (raspberry pi and arduino)

REWORTH - Senior Developer – 2020 – 2022

Senior developer in charge of the backend integration with banks, businesses and financial allies.

Freelance – 2019—2020

Freelance work for approximately a year during the height of the pandemic, I completed 5 big projects along with several smaller ones. Some clients were:

BeAgile - E-learning platform

Mafergastropédia - Tele nutrition platform

CiudadanosVsCovid - **Probono** project, inventory platform that included package pick up planning. Developed for the “Vamos a dar AC” foundation.

MiMandado - Last mile delivery platform with features that included, pick up, inventory, user tracking, live location tracking for drivers

Digital Coaster — Jr developer 2015 — 2018 Lead developer 2018-2019

As lead developer, I was in charge of a 4 person team, we developed web and mobile projects ranging from simple landing pages to fully fledged bank applications.

Important clients: Volvo, Levis LATAM, Tierra Garat, Bancomer, Fondeadora, Fundación Providencia.

C. Tecnológico de México — Consultor 2016-2021

National school network where I deployed Google Classroom, developed internal academic and administrative tools, at the moment working on implementing a fully remote education system
